# FOCUSED LEARNING ABOUT SAFETY AND HEALTH

## CERVICAL CANCER AWARENESS

### WHAT IS CERVICAL CANCER?

- It is the changing of the lining or the cells of the cervix, a part that connects the uterus and the vagina;
- Nearly all cervical cancers are linked to infection of the human papilloma virus (HPV)

### WHAT ARE THE SIGN AND SYMPTOMS OF CERVICAL CANCER?

- Irregular or postmenopausal bleeding
- Foul smelling vaginal discharge

### WHEN DIAGNOSED CAN CERVICAL CANCER BE TREATED?

Yes, it is one of the most successfully treatable cancer forms, if detected early and managed effectively.
